Under the high patronage of his excellence Mr the Minister
of Higher Education and Scientific Research
The Institute of Sport and Physical Education Organizes the

VIIIth International Forum

Science of Physical and Sport Activities
And the Challenges of the Third Millennium

07/ 08 November 2017

The Problematic of the Forum

« Healthy Mind in Healthy Body », Expression which people all over the world repeat it daily with different languages everywhere.

It's the expression that summarizes all what does sport aim to fulfill.

It's absolutely indisputable that the safety of both body and mind are the suprem aim towards perfection. For that we found, through ages, thinkers, wise men and philosophers who did invite people to practice physical sport and ask them to join it to mental sport. By referring to history, we do find what does mention to this relationship so shaped between physical sport (set of physical activities) and intellectual sport (set of mental exercises) which we may call Philosophy.

Because we live in an era its first aspect acute nervousity, tension and anxiety due to current international changes, it becomes necessary and certainly to search for mechanisms within our system of teaching and training to help to overcome these phenomena and overcome all what may resulting from them as other diseases. There is no doubt that our field of sport gives a lot of opportunities for those seeking for a cure far from hospitals.

Inspired by this multi-dimensional perspective, the idea of organizing an international conference where actors' be afflicted to study multiple aspects of physical and sport activities sciences at the level of theorizing and at the level of practicing, taking into account what was produced by recent researches in all the surrounding areas in this field and related to its branches.

Physical and sports activities play an important and pivotal role in building the individual personality in different sides. For that the scientists and researchers efforts, in science of the physical and sport activities, are very important in their quest to confirm the proper construction of the individual within the cognitive and academic system. It's quite difficult to deal with this humanitarian prominent and growing activity by ignoring or without referring to other different dimension factors ; social, economic, cultural and even political, which have a great effect on this field.

The forum brings together sports scientists from different countries to share knowledge, ideas and experiences in the light of new developments in sports science, fitness and health as well as related fields, in addition to contributing to spread awareness inviting to practice sport

in order to gain fitness , permanent activity , strengthen the body and to instill and consolidate the right concepts to physical education and physical and sports activity in their various kinds and at different levels based on ethics, Tolerance, understanding and living together for better societies in light of the third millennium challenges
